Goals:

- To provide the Infection Preventionist in NYS with key concepts and principles for infection prevention and control.
- To provide tools and evidence based interventions to mitigate risk in health care settings.
- To provide the ICP with a basic understanding of microbiology and its application to infection prevention and control.

Objectives:

- Collect analyze and interpret surveillance data specific to the practice setting.
- Implement appropriate measures to prevent the spread of infection
- Apply principles of infection prevention to a variety of practice settings and situations.
- Assess, develop and analyze adult learning concepts for the ICP.
- Define the principles and processes of cleaning, sterilization and disinfection.
- Present the management and communication skills necessary to coordinate an effective Infection Prevention program.
- Describe epidemiology, mode of transmission, susceptibility to various infections, communicable diseases and emerging pathogens.

*Location - Holiday Inn, 205 Wolf Road, Albany*

*Each morning there will be registration and breakfast from 7:15 am to 8 am.  
(Sign in sheets will be available for each day)*
